ineo⁺ 353 P

colour | 35 ppm

Nicely priced **colour**

You know you need a colour printer, but you're worried about the running costs. We understand. That's why the ineo+ 353P has been specifically designed to give you outstanding colour output at a nice price. Not only does it deliver cost-effective and high-quality colours, it also prints black & white documents at virtually the same price as conventional monochrome machines.

35 A4 pages per minute is an ideal speed for office applications. This printer's superior performance is most apparent in the crisp, clear quality of printed text, the most common office application. Since it can also handle paper of up to 271 g/m², the ineo+ 353P is ideal for customised document production.

Everything under control

Are you in control of your printing costs?

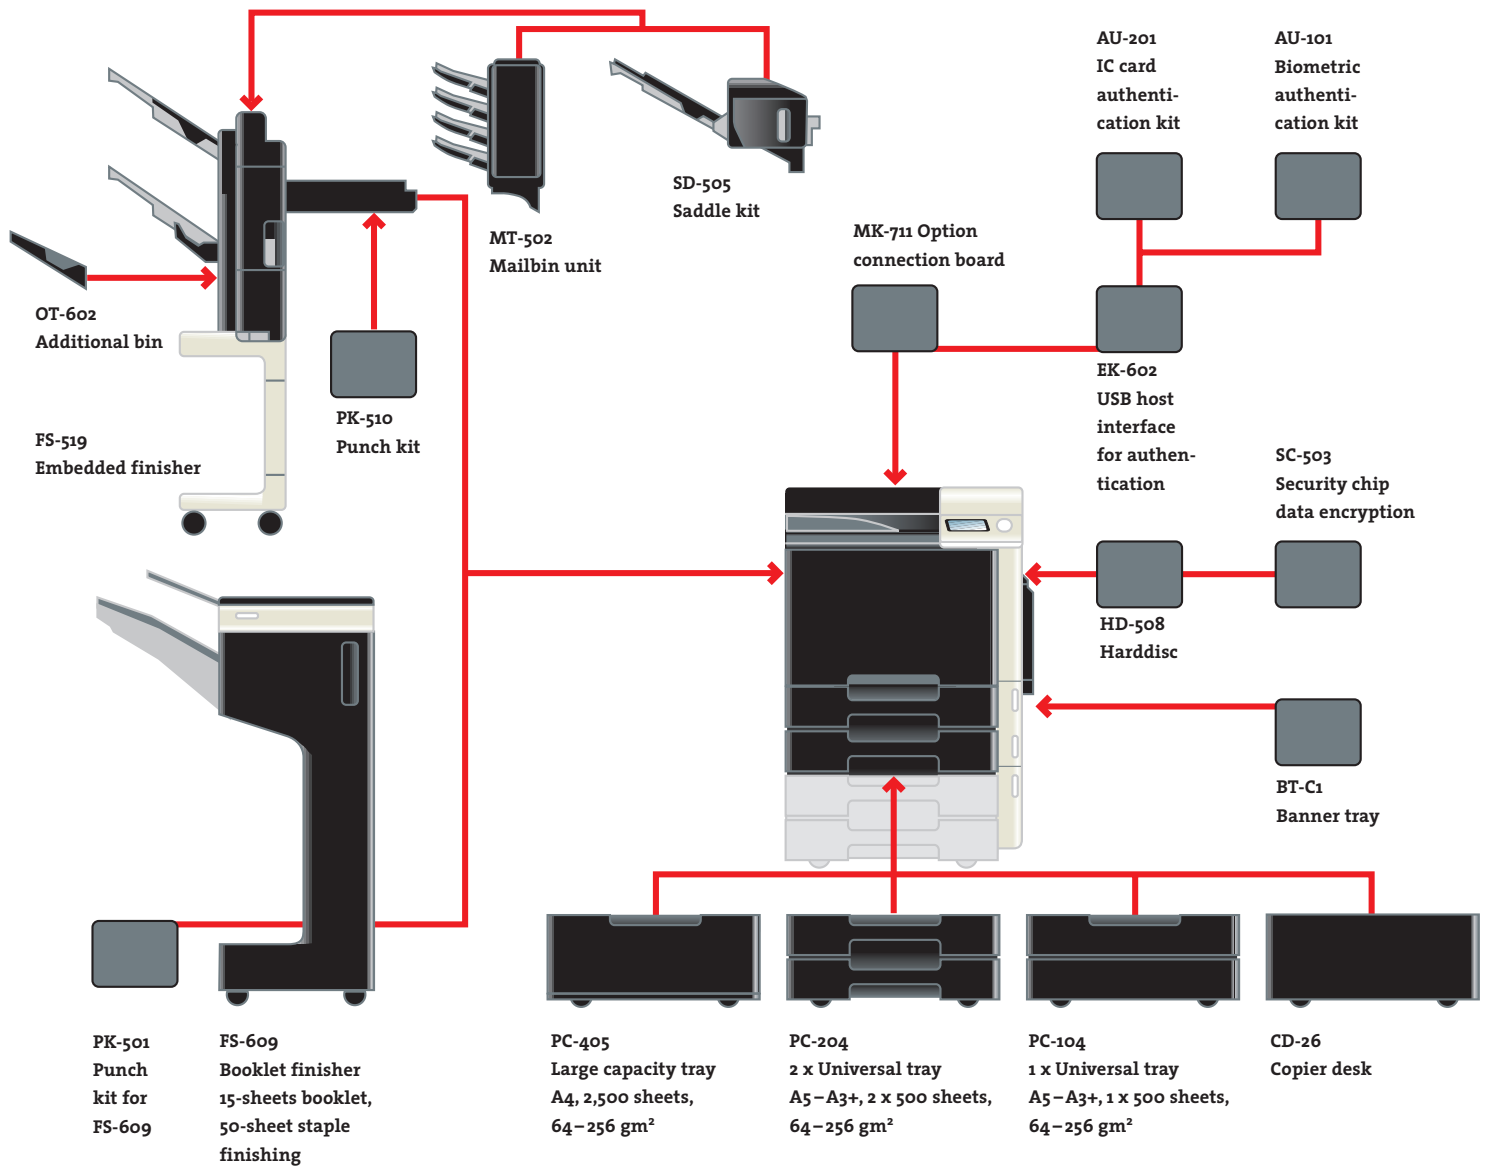

The ineo+ 353P allows you to limit how much a user or cost centre is allowed to print or restrict access to authorised users. Your network administrator will appreciate the easy-to-use management tools and be glad he can import settings from one printer to another. The browser-base Web Connection optimises system supervision so that users can read the status of paper reserves or toner quantity, for example, on the display. Checking or changing machine settings is also easy.

More than mere printing

Internal presentations, external reports, finished booklets or stapled printouts? The ineo+ 353P can produce them all cost-effectively in colour or black & white. Because this printer is much more than a printer. Its optional inline finishing functions, e.g. 4-hole punching and production of entire booklets with numbered pages and the date, will save you time and money – and no special training is required thanks to the intuitive printer driver. It makes the ineo+ 353P easy to operate with straightforward accessibility to the many functions. One of the most popular options, most unusual in an office printer of this size, is the ability to print banners, project plans or tables of up to 1.2 metres long. The ineo+ 353P is lengths ahead of conventional office printers.

How you benefit

- › **Top-quality colour, economical black & white**
- › **35 ppm in colour or black & white**
- › **Time-saving finishing options, e.g. for booklet-making**
- › **Banner-printing (max. 297 x 1,200 mm)**
